SINGLE TRIP PERMIT GENERAL CONDITIONS
 To Transport No divisible Loads exceeding Statutory Size and/or Weight Limits
 Wisconsin Department of Transportation
 MV2605 394

The following conditions apply to operations under all single trip permits issued under s.348.26(2) Wisconsin Statutes and Ch. Trans 254 Wisconsin Administrative Code, unless an exemption is specifically stated.

1. **SUFFICIENCY.** The issuance of a permit is not a guarantee of the sufficiency of any highway or structure for the transporting of the vehicle, load, or vehicle and load.
2. **VEHICLE COMBINATIONS.** A permit may not authorize the operation of more than 2 vehicles in combination. This does not prohibit the use of dollies to support or assist in supporting one or both ends of a trailer.
3. **PERMIT VALIDITY.** (1) A permit is valid only for the vehicle described in the application and permit. (2) A permit is valid only on the route specified in the permit. (3) A permit may not be used in combination with a multiple trip permit to authorize the movement of an oversize or overweight vehicle, load, or vehicle and load. (4) An oversize or overweight vehicle may not be operated on a highway, whether loaded or empty, at any time that the permit is not valid.
4. **ROADWAY LIMITATIONS.** (1) An issuing authority may suspend a permit, or any of its conditions, because of seasonal highway conditions. Examples of seasonal highway conditions include spring thaw, flooding and traffic congestion. (2) A permit is not valid during periods when adverse weather or road conditions, such as fog, smoke, heavy rain, snow or ice, or wind velocity, impair the safety of a movement under the permit.
5. **POSTED ROADS AND BRIDGES.** No condition of a permit may modify any law or regulation limiting loads because of local conditions, including load limits on bridges and highways, seasonal weight restrictions, or load limits imposed because of construction.
6. **VEHICLE REGISTRATION.** (1) A vehicle operating under a permit shall be registered as required by Wisconsin Statutes, and shall be registered at not less than the permit weight or at the maximum available registration weight, whichever is less. (2) All other operational permits required by the department, office of the commissioner of transportation, or other agencies having jurisdiction shall be obtained.
7. **CARRY PERMIT.** The driver of a vehicle operating under a permit shall carry the permit in the vehicle to which it applies and shall have the permit available for inspection by any police officer, representative of the issuing authority, or person in charge of the maintenance of the highway being used.
8. **OPERATING REQUIREMENTS.** (1) The driver of a vehicle operating under a permit shall, whenever reasonable and practicable, maintain a distance of not less than 1,000 feet between the permitted vehicle and any vehicle the driver is following, unless actually engaged in overtaking and passing another vehicle. (2) The driver of a vehicle operating under a permit shall allow traffic approaching or overtaking the permitted vehicle to pass, where it is safe to do so. (3) The right wheels of the towed unit may not leave the roadway, except to allow traffic to pass. A "roadway" does not include paved or unpaved shoulders.
9. **SPEED RESTRICTION FOR LOADS 16 FEET OR WIDER.** The maximum speed of any vehicle with a load 16 feet or wider operating on highways without paved shoulders shall be 35 miles per hour.
10. **DIMENSIONS.** (1) The maximum size, axle, axle combinations, and total weight limitations authorized by a permit may not be exceeded. (2) Property transported under a permit shall be loaded to minimize its size and weight. (3) An oversize vehicle used for transporting loads under a permit shall be reduced to legal size whenever possible when being operated without load. (4) A load transported under a permit may not extend beyond the front of the power unit, beyond the left fender line of the transporting vehicle, or more than six inches beyond the right fender of the transporting vehicle, unless the overhang is minimized by suitable positioning of the load upon the vehicle.
11. **LOADING LIMITATIONS.** (1) Vehicles and loads which, when reasonably divided, would not be oversize or overweight, may not be transported under the permit. (2) Loads which, when reasonably repositioned on the transporting vehicle would not be oversize or overweight, may not be transported under the permit. (3) Loads consisting of more than one article, none of which are oversize, may not be transported under the permit. (4) Loads consisting of more than one article, one or more of which are oversize, may be transported under a permit only if (a) the vehicle and load is not overweight, and (b) the other articles transported do not cause the vehicle and load to be oversize in any manner differently from the largest single article. (5) The load shall be properly secured and fastened to the transporting vehicle. (6) Wheels on one side of a transporting vehicle may not carry more than 60% of the total gross load.
12. **WARNING FLAGS.** (1) When a vehicle, load, or vehicle and load is over length, a single flag shall be fastened at the extreme rear of the load if the over length or projecting portion is 2 feet wide or less. (2) When a vehicle, load, or vehicle and load is over length, 2 flags shall be fastened at the rear of the load to indicate maximum width if the over length or projecting portion is wider than 2 feet. (3) When a vehicle, load, or vehicle and load is over width, a flag shall be fastened at each front and rear corner of the load. In addition, if any part of the load is more than 4 inches wider than the width of load or vehicle at the front or rear, a flag shall be placed at the widest pint of the load. (4) Each flag shall be solid red or orange in color, and not less than 18 inches square. (5) In order to wave freely, flags shall be securely fastened by at least one corner or securely mounted on a staff.
13. **LOCAL ROADS.** A permit issued by the department for a movement which is partly on the state trunk highway system and partly on other classes of highways is valid only on state highways. [Obtain permission from local authorities to travel local roads.]
14. **LIABILITY.** (1) In applying for and accepting a permit, a permittee agrees to: (a) pay any claim for any bodily injury or property damage resulting from operation under the permit for which the permittee is legally responsible; (b) hold the state, its subdivisions, officers, employees and agents harmless from any claim which may arise from operation over public highways under the permit. (2) Whether or not insurance, bond, or deposit as set forth in Ch. Trans 254.14(7) Wis. Admin. Code is required, the permittee shall be liable for all damages which any highway or its appurtenances may sustain by reason of any operation under the permit.
15. **LIABILITY INSURANCE.** The following insurance amounts are required: (1) When the permitted load does not exceed 12 feet in width, 13 2 feet in height, or 100 feet in length and is not overweight by more than 25%:

| | |
|--|------------------|
| <i>Bodily injury liability-each person</i> | <i>\$150,000</i> |
| <i>Bodily injury liability-each accident</i> | <i>\$450,000</i> |
| <i>Property damage liability-each accident</i> | <i>\$300,000</i> |
| <i>OR \$750,000 combined single limit</i> | |

 (2) When the permitted load exceeds the size or weight limitations in par. (1):

| | |
|--|------------------|
| <i>Bodily injury liability-each person</i> | <i>\$200,000</i> |
| <i>Bodily injury liability-each accident</i> | <i>\$600,000</i> |
| <i>Property damage liability-each accident</i> | <i>\$400,000</i> |
| <i>OR \$1,000,000 COMBINED SINGLE LIMIT</i> | |
16. **OVERHEIGHT - WIRES AND CABLES.** When a vehicle operating under a permit is over height, the permittee shall give prior notice to the owners of the overhead wires, cables or other facilities which may be affected.
